14 January 1960

MINGRANDIN FOR: Director of Central Intelligence

SUBJECT: Sino-Soviet Bloc Personnel in Cuba

1. This memorandum is for the Director's information only.

- 2. There is a precise record available to this Division of 98 Sino-Saviet Blac personnel who have visited or resided in Cuba since 1 January 1959. Fifty-nine of these have had Saviet nationality, 6 Chinese Communist, 4 East Corman, 18 Caschoslavakiam, and 11 Yugoslav. For your convenient reference there is appended hereto a chromological summary of those known visits and the apparent purposes therefor.
- 3. In the very pessible but unconfirmed eategery there are two reports of Sime-Seviet Bloc personnel in Oubs which are believed worthy of inclusion in this memorandum. One of these, dated 12 October, indicates the "grave concern" of a miner official

25X1X6

25X1X6

relations with Communist China. This official mentioned specifically that there was a Chinese Communist army officer in Ouba at that time serving as an advisor to the Cuban Army. The other report in question, dated 17 Nevember, indicated that over 30 Chinese Communists had arrived in Habana from Peiping the week of 8 Nevember, but there were no further date and a subsequent investigation could not establish conclusively the validity of the information.

4. From the above categories one passes to the wholly unsubstantiated and eften unevaluated variety of report. There is much of this nature available to the Division, and, taken in the aggregate, it would tend to indicate that there was a greater direct involvement of Sino-Soviet Bleo personnel in Cuban affairs than the first two categories of information by themselves would suggest. By way of example, this Division has a

25X1X

effect that six Seviet technicians were then present in Cuba; no further details were provided and the information remains unsubstantiated.

Similar reports of Seviet officers training Ouben troops fall in the same inconclusive category, and have not been substantiated despite the thereugh-going efforts

to do so. It has come to

25X1A6a

our attention that the Office of Operations and the Federal Bureau of Investigation also have in their files numerous reports of the above nature.
